

Building disabled people's skills on their journey into work

Are you looking for a new project in 2021 that will complement your existing services? Do you currently work in employability, or offer support services to disabled people?

We need partners in Mid and North Wales to help us expand Working on Wellbeing, an employment training and support programme for disabled people in Wales.

This is a three-year programme across Wales, funded by the Welsh Government, and currently delivered in partnership between Scope and Legacy International Group.
